

## DAVID GIST

Parks & Recreation  
Q3 Report - 2022

# APRIL

In the month of April, we were in full swing with baseball and softball. Our daily duties were maintaining the City Park mowing, watering, marking, and dragging all six fields for ball games daily.

In the month of April, we were in full swing with baseball and softball. Our daily duties were maintaining the City Park mowing, watering, marking, and dragging all six fields for ball games daily. Our baseball and softball numbers were up this year as far as kids participating. We have had multiple compliments on the renovations to the fields as well as the concrete work, and sidewalks around the fields. Additionally, by the end of April, the pavilion at McDonald Park neared completion.

# MAY

In the month of May we continued work on our ballfields everyday in preparation for daily games.

The pavilion at McDonald Park was completed, with the exception of doing a level up on the old locker room slab, which will be completed soon as well as adding electrical and lighting.

With lack of rainfall we spent a lot of time trying to keep the ball fields greenish as best we could for better playability watering each field once a week for upcoming events in June.

# JUNE

In the month of June, the softball season had ended, but we continued to mark and maintain the baseball fields for daily games. We hosted a 10u and 14u district tournament that brought in teams from outside areas and it was a great 4 day success.

Following the tournament we hosted the first of concert of the summer series with the Beach Boys tribute band and the Jimmy Buffet tribute band.

After these two events were completed, we had to start getting the City Park prepared and set up for the 8u state tournament in prep it up for the 25 teams that will be coming in from all over the state.
