Parks & Recreation – Q4 Report - 2022

## JULY

In July the park department closed out the regular season for city baseball. We then prepared for the district 14u tournament which was an 8 team tournament hosted at the city park. Following the 14u tournament we then had to prepare the park for the upcoming 8u state tournament host by the city.

This was the largest baseball tournament ever hosted by the city. We had 24 teams from all over the state come to Early for an entire week. Just prior to that tournament we had the main parking area outside of field 5 chip sealed which was a very nice improvement.

Following the state tournament, we closed out July with the first concert of the **Tribute to Summer** concert series.

# AUGUST

In August we jumped into building 19 rock cages for the Town Center street and parking lot lighting. We then began installing irrigation sleeves and installing electrical conduit for the sidewalks, curb and gutters that we to be poured.

We then prepared for the second concert of the series.

## SEPTEMBER

In September we began installing irrigation around the north side of the Town Center parking area, and islands in preparation for trees and sod in those areas.

After the curbs and gutters were poured we harvested and filled the islands with top soil.

We then prepared the city park for the last concert of the summer series.
